DIY Mecanum Wheel Kit Programming Education Kit

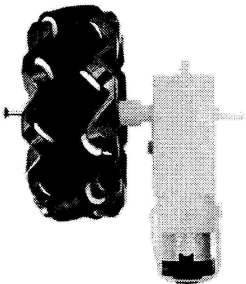

**This product is suitable for
users aged 15 and above**

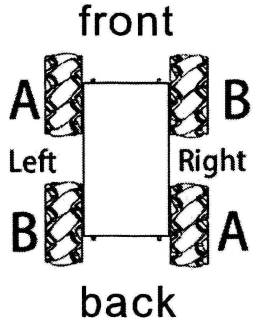

UPC 768434119223

Parameter Description:

Thank you very much for purchasing the Mecanum wheel car accessories. This is a high-performance intelligent robot omnidirectional wheel car for DIY. The TT motor can support a 3V-7.4V power system, and you can easily add the arduino, micro: bit, esp32, RaspberryPi and other motherboards to expand the intelligent car and ROS car according to your familiar habits. Please refer to the parts list and omnidirectional motion logic definition in the manual.
